

# ssat-ai Voice Travel Assistant

Loudest way to plan your travels! Tell your destination and date, pick your ticket and complete your reservation quickly, easily just by talking!

## Problem

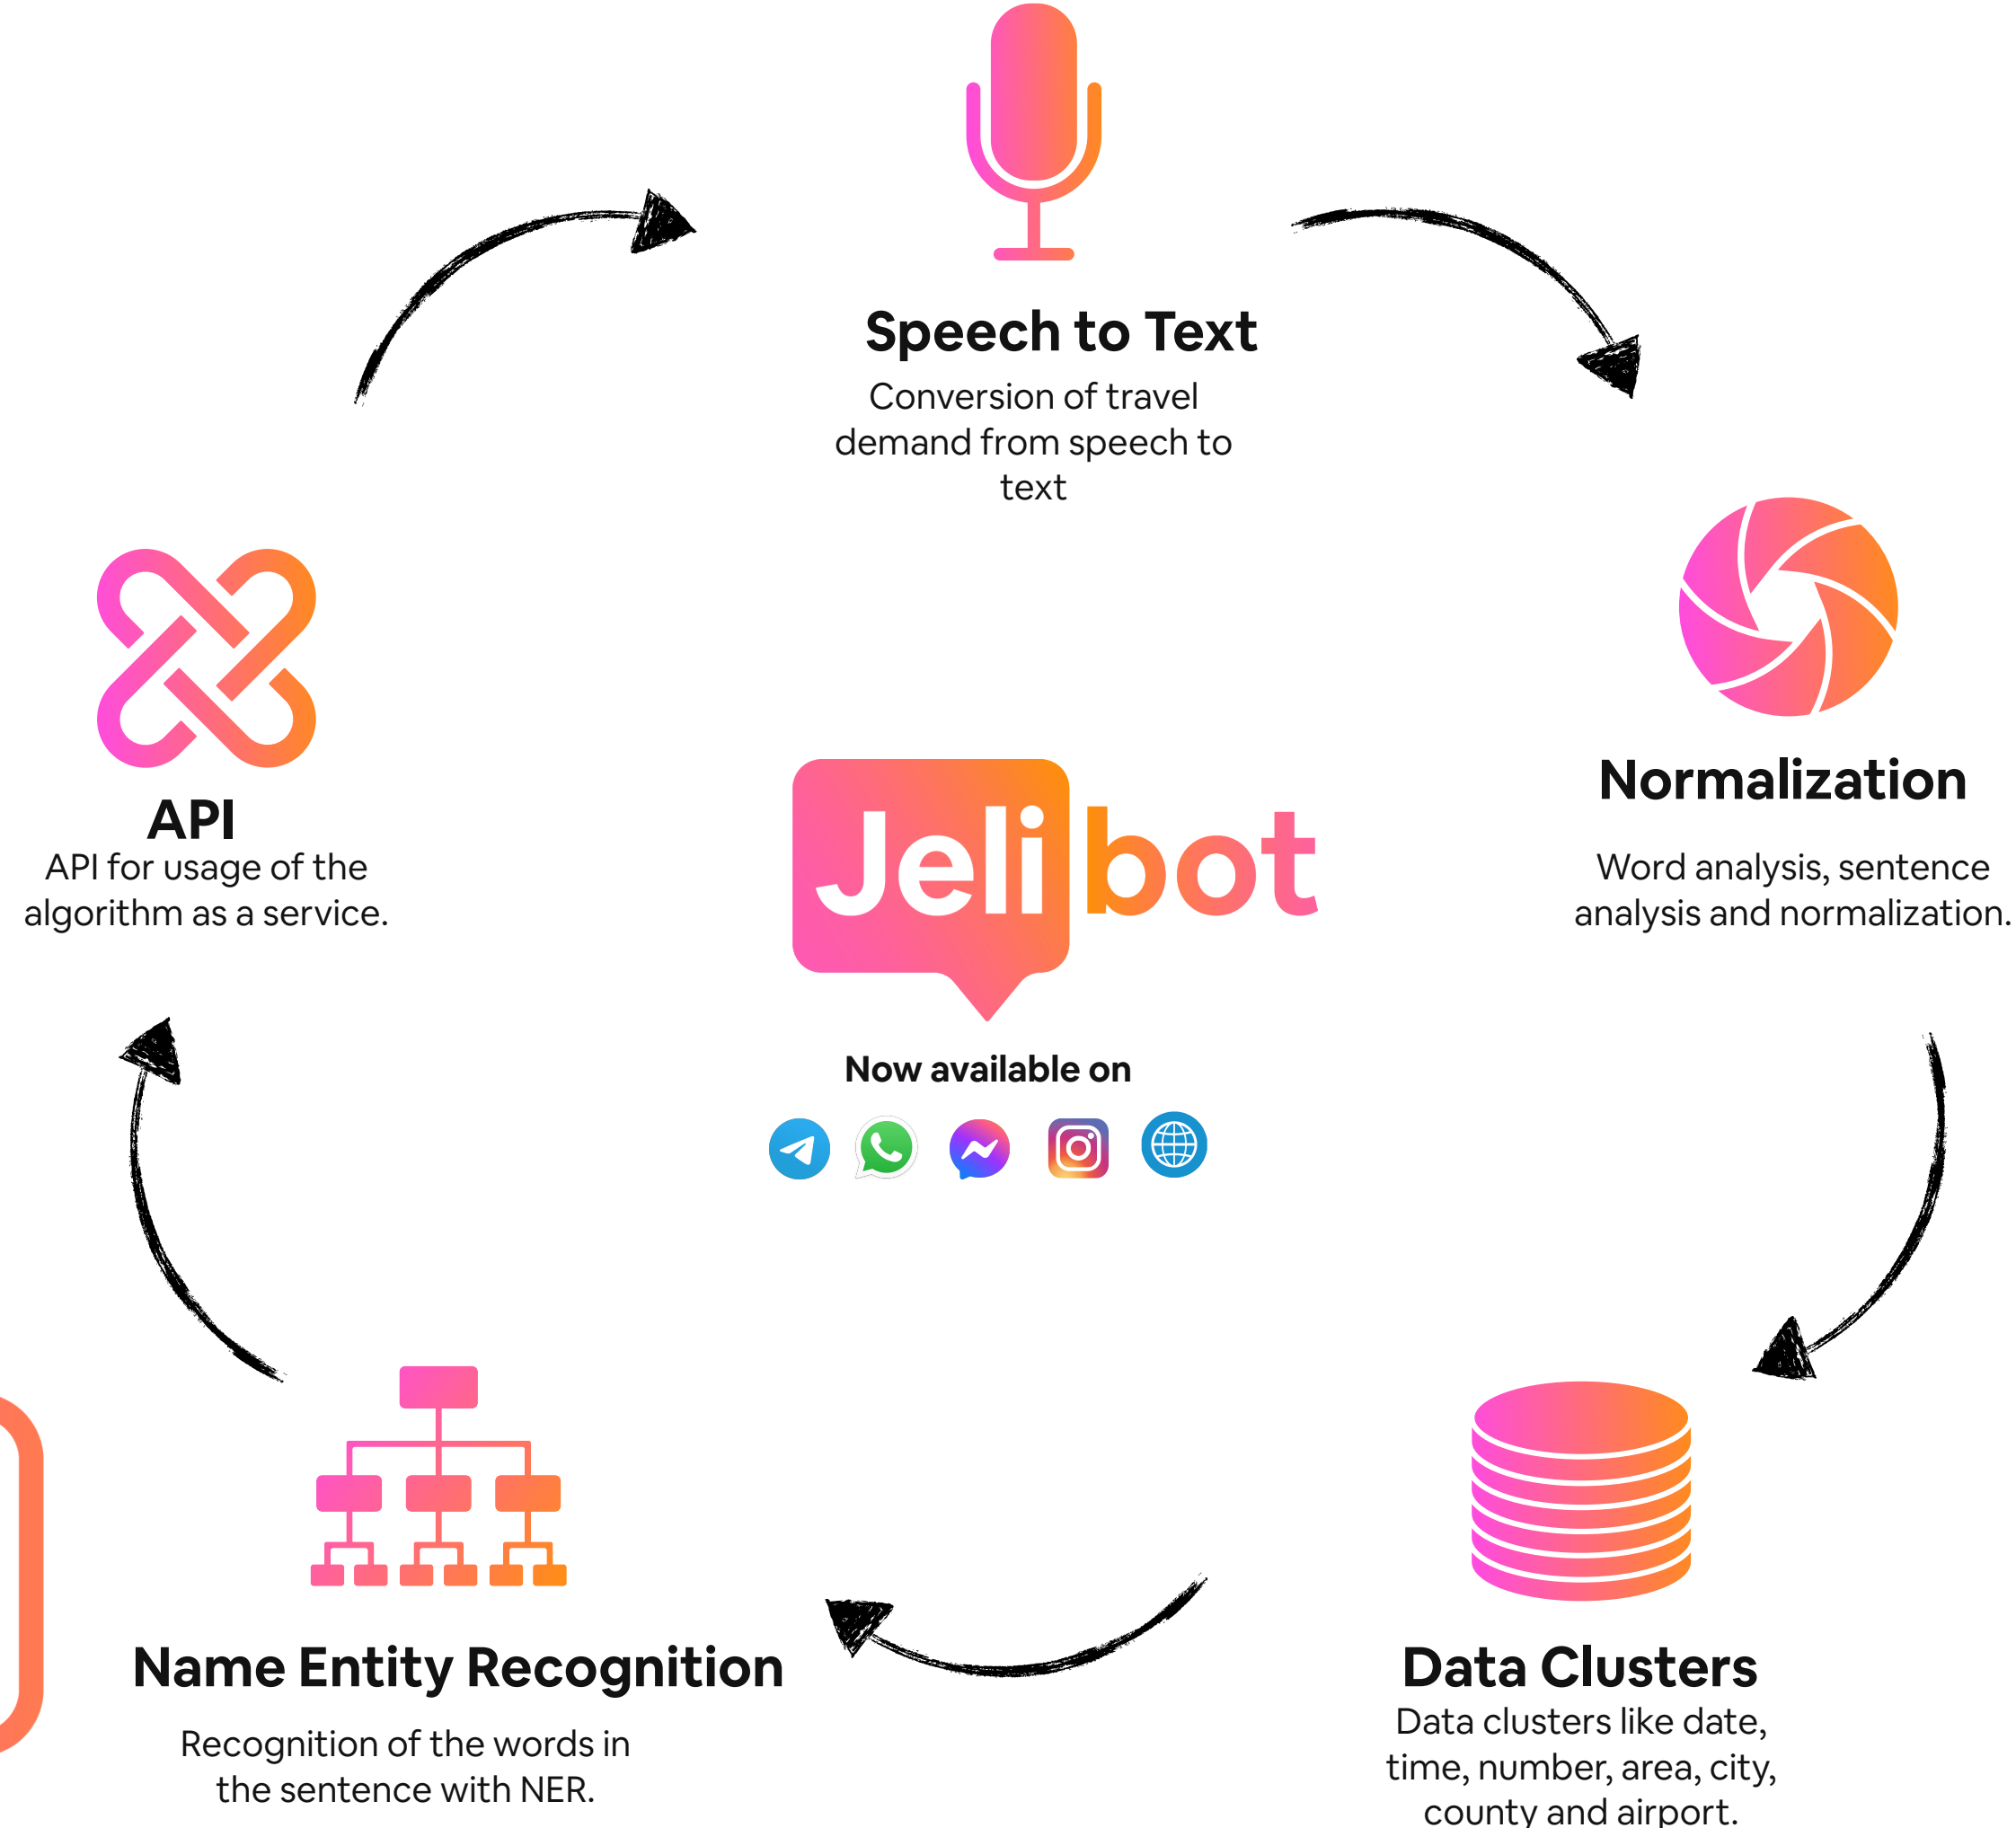

- Existing voice assistants in the market give irrelevant responses.
- Multiple pages of data input screen.
- Data input is hard and open to mistakes on mobile devices.
- Hard to use for old people, impossible for blind.
- It takes too much time to make a reservation(10-30 mins.)

## Solution

- Collective, clickable and right answers from online travel companies.
- Book at once with the best result with the I'm feeling lucky button.
- Receive and complete all reservation on a single page.
- Shortens the whole booking sequence 50% (5-15 mins.)
- It takes too much time to make a reservation. (10-30 mins.)

World	900 Billion \$
Turkey	36 Billion \$
Online Travel	5.4 Billion \$
